COOLENGINE INTERNATIONAL operates as a global provider of supply chain and engineering services. The company specializes in distributing mechanical and electrical equipment, HVACR components, and spare parts tailored for commercial and industrial applications across the Middle East, the Americas, Canada, India, and Europe. We are committed to delivering high-quality engineering products at competitive prices by leveraging a robust global manufacturing network. CEI serves as a valuable resource for mechanical and electrical engineers within the HVACR sector, employing professionals with 16 to 25 years of experience in design, manufacturing, sourcing, sales, and service. CEI certified engineering firm in accordance with ISO 9001:2015 and dedicated sales and engineering offices are in India, China, and Bahrain.

Vision

Our vision is to augment our global market share and expand our supply chain operations worldwide by thoroughly comprehending our customers' needs. We are dedicated to providing exceptional value through high-quality products, innovative solutions, and reliable customer service, all of which distinguish us in the marketplace.

Mission

Our objective is to pursue innovative and customized solutions that enhance the quality of our products and services. We strive to establish robust relationships with high standards to our clients and suppliers. Our unwavering commitment compels us to deliver exceptional quality and sustainability through a comprehensive, one-stop approach.

Quality Policy

Quality is one of our fundamental values. As an organization prioritizing customer satisfaction, we endeavour to provide optimal solutions through superior products and services. We emphasize timely delivery, strict adherence to specifications, and value for money, all bolstered by effective communication and prompt responses. The reliability and safety of our products, tailored to meet customer needs while adhering to sustainable principles, are pivotal to our success.

WHY US, Advantages of Choosing CoolEngine International

- ▶ One-stop supplier of HVACR industrial components, parts, and automation machinery worldwide.
- ▶ Assured products with the highest quality standards in the industry.
- ▶ Reliable Engineering Service.
- ▶ Transformative solutions crafted with precision design for exceptional results.
- ▶ Competitive pricing within the HVACR industry is facilitated by our diverse global sourcing opportunities and experiences.
- ▶ Ensuring timely delivery complemented by reliable and professional after-sales support. Regardless of the size of your order, we are fully prepared to address your requirements with outstanding efficiency. Customer satisfaction remains our foremost priority.

HVACR COMPONENTS & PARTS

Cool Engine International has officially partnered with Broad Ocean Motor Group, effective in 2023. This collaboration involves representing BOM's factory direct office in India, the Middle East, and North America. Our dedicated team is committed to enhancing sales, engineering, marketing, and after-sales support for all types of motors, blowers, and Inverter Driver

Major Customers of BOM

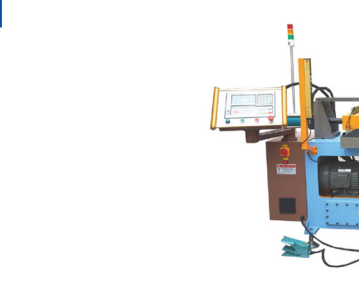

COOLENGINE INTERNATIONAL has formed a collaboration with a leading manufacturer of automation mechanical equipment, which has 36 years of experience in the HVACR intelligent equipment manufacturing sector. Our organization operates factories and research and development offices in both China and Thailand, focusing on the production of a variety of mechanical machinery and tools tailored to meet the specific needs of our global clients

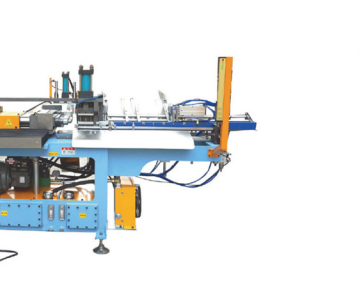

END FORMING SERIES:

Single stations end forming machine with loading and unloading device

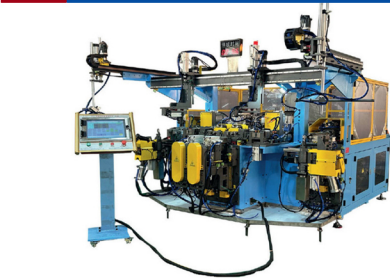

End forming machine with loading and unloading device

Multi – stations end forming machines

CHIPLESS CUTTING & BENDING INTEGRATED MACHINE SERIES FOR COILED COPPER TUBS:

Chipless cutting & bending & end forming integrated machine (two sets of separate cutting & bending devices, and bending right – left sharing)

Chipless cutting & bending & end forming integrated machi (one set cutting device and two sets of separate bending de

Chipless cutting & bending & end forming integrated (one set cutting and bending device only)

SPIRAL FORMING MACHINE SERIES:

Automatic spiral forming machine (press type) with loading and unloading device

Automatic spiral forming machine (twist type)with loading and unloading device

Automatic double – pipe heat exchanger spiral forming machine

CAPILLARY TUBES CUTTING AND FORMING MACHINE SERIES:

Capillary tube chipless cutting and winding integrated machine

Capillary tube chipless cutting and beading integrated machine

Capillary tube chipless cutting and beading integrated machine

TOOLINGS

Straighten wheels

Push wheels for cutter plate

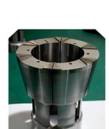

punching head for punching m/c

Punching head for end forming machine

Collect chunk for spinning m/c

Main collect chunk for spinning m/c

Clamping die, cutter plate for cutting m/c

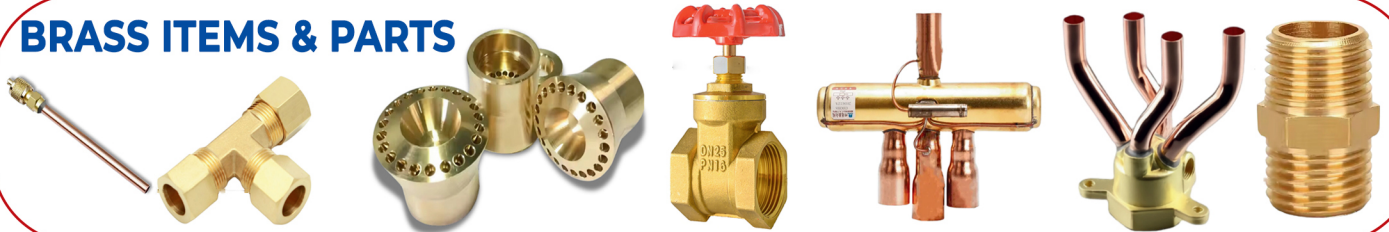

Cutter assembly

Cutter assembly

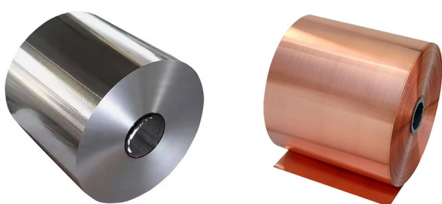

BRASS ITEMS & PARTS
